SUMMARY

AI Product Manager and **first employee** at a VC-backed agentic-AI startup, where I helped scale the business from **\$100K to \$1.2M+ ARR** and **50 to 300+ customers** in 12 months. I work across the full stack of an AI product: shipping LLM agents that resolve **thousands of conversations a day at 94%+ automation**, cutting inference cost **25–40%** through context engineering, and owning GTM, pricing, and onboarding for D2C brands from *Shark Tank* startups to unicorns. Engineering-trained at BITS Pilani with hands-on computer-vision and ML research — I build with the models, not just around them.

EXPERIENCE

Sagepilot AI Technologies

Bengaluru, India

Agentic-AI SaaS for D2C & e-commerce | Neon Fund-backed

AI Product Manager

Nov 2025 – Present

Product Manager, Intern

Jul 2025 – Nov 2025

- **First employee**; scaled the platform from **50 to 300+ customers** and **\$100K to \$1.2M+ ARR** in 12 months, and supported the company's first funding round (Dec 2025) — growing from a **3-person to a 23-person** team.
- Designed, built, and deployed **300+ chat**, **50+ voice**, and **200+ reputation-management agents** handling thousands of daily interactions across WhatsApp, Instagram, Facebook, X, and email — at **94%+ automated deflection** and **4.2+ CSAT**.
- Shipped a dynamic context-recovery feature that **cut LLM inference cost 25–40% per turn** with no loss in response quality.
- Led implementation engineers and interns to onboard **50+ businesses**; cut client onboarding and agent setup from **3–4 hours to under 20 minutes**, trained **100+ CX and marketing teams**, and launched usage-billed revenue lines (Marketing AI, Insights AI).
- Owned deals end-to-end from demo to go-live for *Shark Tank* and unicorn D2C brands (Boldfit, Treebo Hotels, Bonkers Corner), closing directly with C-suite founders.
- Defined GTM, pricing, and packaging for the India and US markets, and built internal AI tooling — automated proposal/NDA generation, volume-based pricing, CRM deal-lifecycle sync, and cross-meeting context graphs — plus model benchmarks for evaluation.

Meta Fintech

Remote

Market Research Analyst, Intern

May 2025 – Jul 2025

- Benchmarked MetaTrader 5 against leading Indian algo-trading platforms (Zerodha, Upstox, Streak, Tradetron, AlgoBulls) on scripting, backtesting, latency, and multi-asset support; sized the retail vs. institutional market using SEBI/NSE data and proposed a localization-, pricing-, and partnership-led entry strategy.

CSIR-CSIO — Central Scientific Instruments Organisation

May 2023 – Jul 2023

Research Trainee

- Built a **machine-learning model to detect dental plaque from intraoral tooth images**, engineering RGB and colour-space features and training SVM classifiers in Python (TensorFlow, scikit-learn), alongside a survey of LiDAR/SLAM techniques.

PROJECTS

SmartDeploy — IoT Sensor-Deployment Planner for Smart Buildings (B.E. Thesis)

Python, PyQt6, OpenGL, 3D

- Built a desktop application that plans IoT sensor networks on a building's **3D digital twin** — ray-cast (Möller–Trumbore) sensor placement with per-node configuration (sensor modules, processors, protocols), and **pattern-based auto-deployment** across floors, walls, and ceilings (Python, PyQt6, OpenGL, Trimesh, NumPy).

SKILLS

AI / ML: LLMs & Prompt Engineering, Agentic AI & Orchestration (LangChain, LangGraph), RAG, Model Evaluation & Benchmarking, MCP, NLP, Deep Learning & Computer Vision (TensorFlow, Keras, CNN/RNN), scikit-learn

Engineering & Data: Python, SQL, Java, FastAPI, Next.js, React, Flutter, REST APIs, PostgreSQL, SQLite, Pandas, NumPy, Power BI, Tableau, Git

Product & GTM: Product Management, B2B SaaS, GTM & Pricing Strategy, Customer Success, Revenue Operations, Stakeholder Management, Onboarding & Implementation

EDUCATION

Birla Institute of Technology & Science (BITS), Pilani

2021 – 2025

B.E., Electrical and Electronics Engineering

CBSE Class XII: 96.2% (2020) | CBSE Class X: 92.6% (2018)

CERTIFICATIONS

Machine Learning Specialization (DeepLearning.AI & Stanford) | Python 3 Programming (Univ. of Michigan) | SQL & Data Analysis (Coursera)
